# eSPRINTER

## TOP REASONS TO BUY AN eSPRINTER

The next evolution of commercial delivery is here. Intelligent, reliable, and built to exceed expectations – the Mercedes-Benz eSprinter is ready to recharge your business.

The power is in your hands – the eSprinter is powered by a standard 100KW or optional 150KW engine (permanent magnet synchronous motor).	A Mercedes-Benz Vans Battery Certificate provides protection and peace of mind. An industry-leading option to extend to 8 yrs/185,000 mi is available with maintenance or complete service contract.
Up to five regenerative braking modes, including an intelligent regenerative braking mode (D <sub>auto</sub> ), allow for a customizable driving experience.	Next-gen MBUX, available in a 10.25" touchscreen, keeps you connected on the move with wireless Apple CarPlay®, Android™ Auto, and a “Hey Mercedes” digital assistant.
Gross Vehicle Weight Rating of 9,370 lbs. is below the limit requiring extra license and certifications for commercial use.	Take on heavy loads and get the job done with reliable towing abilities.
Reach your full potential on the road with a battery capacity of 81 kWh or 113 kWh available up to 206 miles.*	The first four eSprinter service appointments are included with your purchase and allow for a “no worry” maintenance schedule. Mercedes-Benz has you covered!
Stay in motion with DC fast charging that powers your eSprinter from 10% to 80% in as little as 32 minutes with 81 kWh battery or 42 minutes with 113 kWh battery with optional 110 kWh DC charging.**	Numerous upfit options are available, utilizing the established Sprinter Cargo layout.

\*Based on full charge. Demonstrated range reflecting current capability is based on testing consistent with US EPA MCT drive cycle methodology (<https://www.epa.gov/greenvehicles/fuel-economy-and-ey-range-testing>). The actual range varies with conditions as it depends on the individual driving style, road and traffic conditions, outside temperature, use of climate control/heating system, etc.

\*\*Minimum charging time of 10 to 80% under optimum conditions at DC fast charging station with a supply voltage of 400 volts, 300 A; the charging time can vary depending on diverse factors, such as ambient and battery temperature and due to the use of auxiliary consumers, such as heating. Maximum peak charging capacity at DC fast charging station with a supply voltage of 400 volts, 300 A; the maximum charging capacity is dependent on diverse factors, such as ambient and battery temperature and the charge status of the battery when starting to charge. AC charging is also available.

## WHAT PEOPLE ARE SAYING ABOUT THE eSPRINTER

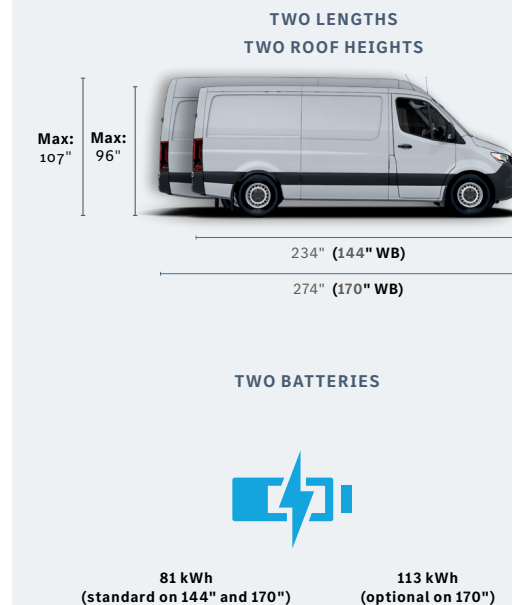

“The same cavernous loading space as a comparable diesel-powered model; buyers will have 488 cubic feet to fill.” – autoblog.com

“[The eSprinter is] an electric van to deliver sustainable commerce.” – slashgear.com

## CONNECTIVITY

### CABIN PRE-CONDITIONING

With Cabin Pre-Conditioning, you can start the auxiliary heating or cooling of your vehicle remotely via the Mercedes-Benz App.

### NAVIGATION WITH ELECTRIC INTELLIGENCE

For long-distance travel, Navigation with Electric Intelligence automatically calculates a route that includes necessary charging stops.

### REMOTE LOCK AND UNLOCK

With the Remote Locking/Unlocking function, you can check the lock status of your vehicle and quickly lock your doors using the Mercedes-Benz App.

### OVER-THE-AIR UPDATES

Get the latest software and upgrades installed wirelessly with Over-the-Air Updates, so the technology in your van is always up to date.

\*\*Both motors are technically capable of 400 Nm/295 lb-ft, ensuring that if maximum power is requested via kickdown (start up on a hill, entering a freeway via ramp, etc.), it will be provided.

\*\*\*Estimated driving range determined internally in accordance with the "WLTP test procedure" certification method with a fully charged battery for European versions. Driving range may vary based on model, terrain, temperature, driving style, optional equipment, use of vehicle features, and other factors. U.S.-specific figures to be announced closer to launch.
